

## **Senior Site Engineer / Project Manager / Principal Engineer**

Due to continued growth and work winning success, Edwards Diving Services are seeking to recruit Senior/Principal Engineers to site manage our pipeline of contracts. As a multidisciplinary contractor we work across a myriad of sectors providing marine & civil engineering services to the water industry, energy sector, highways and rail infrastructure, among many others.

We are looking for professional engineers who are experienced at managing CDM projects as either client or contractor. Our work is not your typical construction work, it usually involves bespoke engineering solutions within challenging locations and dynamic environments.

Successful candidates will be degree qualified (or equivalent) in Civil Engineering or other relevant subject, ideally chartered or working towards chartership and a member of a relevant engineering institution i.e. ICE. Capable of scoping, pricing, planning then executing by site managing our delivery of engineering projects for key clients, whilst integrating with our Company projects providing technical support and team management.

EDS' activities are extremely diverse and there will be opportunity to travel nationally to work on a broad range of sites for an equally broad range of clients. We encourage development of skills, both practical and technical, in order to develop a multi-skilled workforce which can adapt to the range of environments we work in and tasks we undertake.

Applicants must be content to work on site regularly and be confident to work in water, from boats and in confined space environments; full training will be given. The applicant will need to be flexible to meet the needs of travelling to/from sites to meet the needs of our clients and must be able to work away from the EDS base for durations as work requirements dictate.

### Required skills

- BEng level degree (or equivalent) in Civil Engineering or similar
- Excellent verbal and written communication skills
- Experience of site engineering / project management within a relevant industry
- Experience of site managing CDM projects
- Experience of writing detailed CPP's /RAMS and client reports
- Excellent ability to speak and write in clear and concise English
- Proficiency in the use of Microsoft Office applications
- Capable swimmer
- Be eligible to live and work in the UK
- Hold a full valid UK driving license
- Above all, a proactive 'can do' attitude with the willingness to innovate

### Desirable skills

- Member of the Institution of Civil Engineers or similar / working towards Chartered or Incorporated Engineer status
- Engineering project experience in the water, rail, marine, highways sectors

Salary and terms will be competitive and negotiable depending on the candidate. All EDS staff benefit from a competitive package including private healthcare and a stakeholder pension.
